2023 Summer Programs in the Park

June 3rd "Feathered Friends" Sarett Nature Center will discuss what makes a bird a bird. Learn more about important features like feathers, beaks, feet, nests, eggs, food, migration, songs, and camouflage.

June 10th Join DNR licensed animal rehab expert Patty Kloosterman as she teaches us about what a wildlife rehabilitator does and some things you can do to help wildlife.

June 17th Water Festival (Petting Zoo will be open during Kids Zone)

June 24th "Great Goats" Join Jamie Cardella as she brings some goat friends to the park for an educational and interactive experience.

July 1st "Wildlife Wonders" Join Sarett Nature Center as they bring a variety of animal friends to discuss animal adaptations and classifications.

July 8th "Incredible Insects" Join Kalamazoo Nature Center and learn what sets insects apart from other bugs by learning about their different characteristics and life cycles as well as their amazing and diverse habitats. Meet a live bug brought by the educator.

July 15th "Fun with Three Rivers Public Library" Join children's librarian, Peter Butts as he reads stories about some of our zoo animal friends.

July 22nd "Slime and Scales" Join Sarett Nature Center as they compare the worlds of reptiles and amphibians. See live specimens, learn frog songs, and learn more about wetland wildlife.

July 29th "A Forests Family Album" Join Kalamazoo Nature Center and learn about parts of a tree and their function. Learn about the different stages of a tree's lifecycle and how they are important to its growth and the forest habitat in which it lives. Discuss why and how we should preserve a healthy and well-balanced forest.

August 5th "A Heap of Sheep" Join Jamie Cardella as she brings some sheep friends to the zoo for an educational and interactive experience.

August 12th "Michigan Mammals" Join Kalamazoo Nature Center and learn about carnivores, herbivores, and omnivores using actual animal artifacts. Get a chance to observe and feel various animal furs and skulls to identify and differentiate various Michigan mammals.

August 19th "Rocks and Fossils" Join Sarett Nature Center and learn about the sedimentary, igneous and metamorphic rocks that make up the earth's surface. Get the chance to check out some rock and fossil samples.

August 26th "Who Eats Whom" Join Kalamazoo Nature Center and build a food chain from the ground up and follow the flow of energy from producers and consumers as well as from sunlight to soil. Meet a live animal and discover who eats whom in the forest.
